About Elitekem

At Elitekem Laboratories Pvt. Ltd., we believe chemistry is more than formulas—it's the foundation for discovery. Based in Hyderabad, we support pharmaceutical, biotech, and research institutions around the world with advanced chemical synthesis, development, and manufacturing solutions.

Our team combines deep scientific knowledge with state-of-the-art lab infrastructure to help clients at every stage whether it's discovery, development, or commercialization. We pride ourselves on precision, compliance, and a personal approach that ensures each project meets global quality and regulatory standards.

As your long-term R&D partner, we provide tailored solutions, clear communication, and strict confidentiality. Every engagement is a collaboration, where your goals are our priorities.

Core Strengths

- Experienced Scientific & Technical Team
- Strong Quality Management Systems
- Confidential Project Handling
- Regulatory-Oriented Operations
- Timely Project Execution
- Client-Focused Approach

Our Capabilities

Elitekem offers integrated chemical solutions across all stages of development, making it easier for clients to move from concept to commercialization efficiently.

Our expertise includes:

API Intermediate Synthesis & Route Development

Process Optimization & Scale-Up

Impurity Profiling & Characterization

Regulatory Documentation Support

Customized Manufacturing Solutions

Service Ecosystem

From early-stage molecule development to specialized compound supply, our service ecosystem is designed to be a single, trusted platform supporting pharmaceutical and research organizations. We're here to make your journey simpler, faster, and more predictable.

Our Services

1 API Intermediate Synthesis & Route Development

End-to-end API intermediate synthesis from route scouting to scale-up, delivering scalable and regulatory-aligned chemical processes.

2 CDMO Services

Elitekem offers flexible Contract Development and Manufacturing services tailored to your project needs. We combine technical expertise with regulatory aligned documentation to support every stage of your development program.

3 Custom Synthesis (Small Molecules)

When molecular challenges are complex, we provide custom synthesis solutions that meet your exact specifications. Our team delivers high-purity compounds in quantities ranging from milligrams to multi-kilograms.

Our Services

4 API Impurities & Reference Standards

We specialize in synthesizing, isolating, and characterizing pharmaceutical impurities and reference standards, supporting regulatory submissions, stability studies, and quality control.

6 Specialty Chemicals

We develop and supply specialty chemicals and intermediates for pharmaceutical, research, and industrial applications meeting diverse technical and performance requirements.

5 Peptide Synthesis Services

Our peptide synthesis services include sequence optimization, purification, analytical characterization, and validation helping your research and development efforts move forward efficiently.

Products & Chemical Portfolio

Elitekem provides a wide range of high-quality chemical products to support research, development, and regulatory activities.

Our portfolio includes:

- API Standards
- Impurity Standards
- Nitrosamines
- Pharma / API Drug
- Research Tools
- Building Blocks
- Chiral Molecules
- Miscellaneous
- Nitroso Compounds
- Carbohydrates
- Glycerol Derivatives
- Neurochemicals
- Antibiotics
- Environmental Contaminants
- Amphetamines
- Food-Related Compounds

Every product comes with detailed technical documentation, including CAS number, molecular structure, and specifications. Custom sourcing is available simply provide the CAS number or technical requirement.

Our Working Process

1. Requirement Assessment

Listening carefully to your specifications and objectives.

2. Feasibility & Planning

Evaluating technical possibilities, timelines, and costs.

3. Development & Synthesis

Designing routes, optimizing processes, and synthesizing compounds.

4. Quality Control & Documentation

Ensuring thorough testing, validation, and regulatory compliance.

5. Delivery & Support

On-time delivery with ongoing technical support.

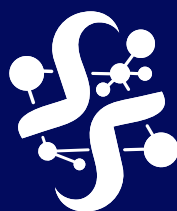

Why Choose Elitekem

- Research-Driven Scientific Culture
- Strong Regulatory Awareness
- Proven Technical Expertise
- Strict Confidentiality Standards
- Customized Project Execution
- Consistent Quality Assurance
- Reliable Delivery Timelines
- Long-Term Partnership Approach

We build relationships founded on trust, transparency, and excellence your success is our mission.

Let's Collaborate

Partner with Elitekem to accelerate your research, development, and manufacturing programs. Whether it's API intermediate synthesis, custom synthesis, impurity standards, peptide development, or specialty chemicals, our team is ready to support your goals.
